

# Get your priorities right.

Fit the necessities  
before considering accessories!

4WD EQUIPMENT is the leader in four wheel drive suspension systems. Their quality, fine-tuned, Ultimate Suspension System Kit increases your suspension travel, allowing dramatic improvements in towing and carrying capacity, coupled to far greater control, safety and comfort.

4WD Equipment pioneered the long travel suspension industry in Australia and, through years of research and

development, has introduced to the after-market quality matched suspension components unsurpassed by any other company.

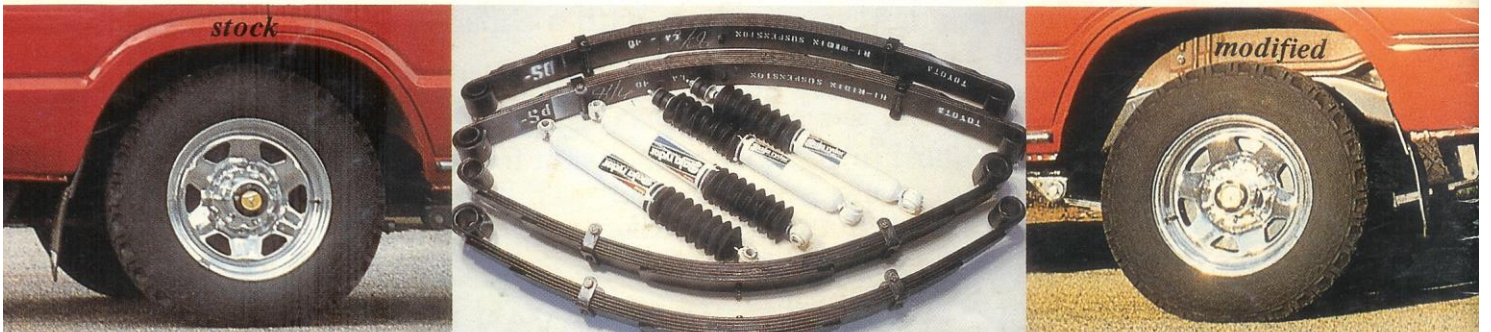

The Ultimate Suspension Kit is available with the choice of race proven Gabriel Baja Ryder 9-stage oil, or De Carbon gas shock absorbers.

Quality above all rates high at 4WD Equipment.

Their long-travel, multi-leaf progress-

ive springs are made in Australia from the highest quality spring steel to exact specifications to suit our tough and gruelling outback road conditions, yet provide a super smooth ride on the local freeway.

*The above photographs graphically illustrate the difference between the unladen stock HJ60 towing an empty 18ft Viscount caravan, and the modified version.*
