

## Toyota Land Cruiser...because you never know.

It doesn't matter if you're out driving for work or for pleasure, you never know when the elements may decide to test your vehicle.

That's why you need Toyota LandCruiser – the toughest 4WD on earth.

Put it up against snow, sand, rock, streams, in fact anything else you care to name. It's as much a part of this country as the kangaroo.

Over 100,000 LandCruisers have

been sold in Australia since Sir Leslie Thiess brought the first ones in to help build the Snowy Mountains Hydro-Electric project.

Wherever there's rugged work to be done you see Toyota LandCruisers.

They're used in Australia's Antarctic Territory, by police, the Army, bush fire brigades, geologists, foresters. Farmers wouldn't rely on anything else.

There are 14 models, from the

luxurious station wagon to the military-style LX hardtop.

See your Toyota dealer for a test drive.

Because you never know...

# TOYOTA

Oh what a feeling!
