

BILSTEIN LONG TRAVEL GAS SHOCK ABSORBERS "WORLD FIRST" FOR *Supa-ride* SUSPENSION SYSTEMS

WHY PAY MORE FOR LESS

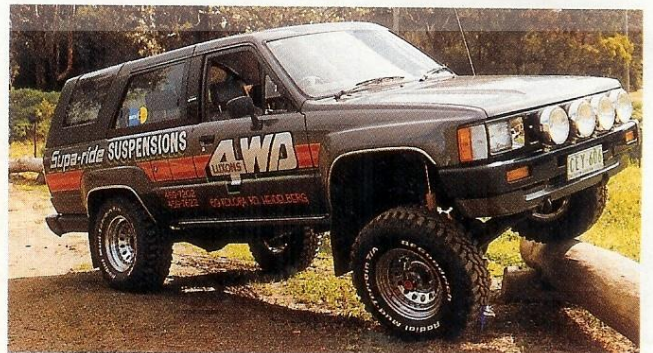

Supa-Ride Suspension Systems offer you the world's finest long travel gas shock absorbers, specifically designed for use in 4WD applications. Tuned & valved exactly to our long travel, progressively rated springs, they provide maximum comfort, durability, and above all, quality.

Unlike other suspensions available, we do not offer compromised or alternative shock absorbers for our long travel systems.

BILSTEIN gas pressure shock absorbers are fitted to around 95% of winning race & off road competition vehicles. Just ask Craig Martin (current National Off-Road Champ.), Peter Brock or Dick Johnson what brand shock absorbers they use.

No matter what make or model BILSTEIN will improve road handling, minimise braking distance, eliminate road pitching and nose dive under braking, transforming your 4WD into the most comfortable, predictable and safest vehicle at all times.

For any suspension problem be it towing, load carrying or simply lack of clearance, Supa-Ride has a solution for you.
